

Verify that when a retailer constant value is cleared, confirmation modal and edit modal are removed and user sees an empty value of constant in the retailer table

1 | ID: [132834](#) | Type: Test Case | Created: 6/30/2022, 12:24:03 PM by Elisaveta Dhrami

Iteration Path: All Access\2022\S 13 - (06.22 to 07.05) - Prod 7.18 | State: Ready | Assigned to: Elisaveta Dhrami

Repro-Steps:

Given I am logged in to system as Support Admin user

And I am in Retailer Constant menu

And I find a retailer constant of type Boolean that has a set value in Value field

And I click on the pencil icon

Then I should see the Edit Retailer Constant modal open up

And I should see the correct data of the constant

And I should see the correct boolean value (True or False) being selected and highlighted in green color in the modal

And I should see the correct values of the constant for other retailers

When I click on the Clear Value modal

And I click on the "Yes, Delete" button in the new confirmation modal

Then the confirmation modal should disappear

And the Edit Retailer Constant modal should disappear

And I should be redirected to the retailer constant table

And I should see an empty Value cell for the retailer constant row in the table

And I should see all other fields having the correct value

Given I am logged in to system as Support Admin user

And I am in Retailer Constant menu

And I find a retailer constant of type String or Numeric that has a set value in Value field

And I click on the pencil icon

Then I should see the Edit Retailer Constant modal open up

And I should see the correct data of the constant

And I should see the correct values set in Value field

And I should see the correct values of the constant for other retailers

When I click on the Clear Value modal
And I click on the "Yes, Delete" button in the new confirmation modal
Then the confirmation modal should disappear
And the Edit Retailer Constant modal should disappear
And I should be redirected to the retailer constant table
And I should see an empty Value cell for the retailer constant row in the table
And I should see all other fields having the correct value
